Read the following text carefully, and then in your ANSWER BOOKLET answer all the questions that follow. Your answers should be based on the text.

Megaprojects are extremely large investment projects, which are designed to encourage economic growth and bring new benefits to cities. Although megaprojects vary in terms of size and cost, they are all, by definition, expensive, public projects that attract a high level of interest and media coverage. Projects range from motorways, airports, stations, tunnels, bridges, etc. to entire city complexes.

Many megaprojects such as Masdar City, a megaproject in Abu Dabi, have been criticised because of their negative effects on a community or the environment.

Energy will be provided by solar power and wind farms, and there are also plans to build the world's largest hydrogen plant. Biological waste will be used as an energy source too, and industrial waste will be recycled.

In conclusion, the benefits of Masdar City for the community and the environment greatly outweigh any disadvantages. If the aims of the developers are realised, Masdar City will be a blueprint for future urban planning that will inspire similar megaprojects in other countries.
